Released: March 1993

## ARAPAHOE MOST POPULAR VARIETY PLANTED FOR 1993

### Highlights

Arapahoe became the most popular winter wheat variety sown for the 1993 crop with 28.6% of Nebraska's acreage. Thunderbird became the second most popular variety with 12.4%. Centura rose to third place with 8.5%. Siouxland dropped to fourth with 8.2%. Redland, number one in 1991, dropped to fifth place with 7.9%.

Arapahoe was the leading variety in the Northwest, North Central, Central, Southwest, and South Central Districts. Redland dominated the Northeast District. Thunderbird was the most popular in the East Central and Southeast Districts.

### Data Source

The wheat variety data was provided through the response of many Nebraska wheat producers in our annual Fall Acreage and Production Survey. The wheat variety survey summary included 1,315 reports representing about thirteen percent of the State's total planted acreage estimate.

This wheat variety survey summary was made possible with Nebraska producer wheat check off funds provided by the Nebraska Wheat Board.
