Released: March 1994

## ARAPAHOE MOST POPULAR VARIETY PLANTED FOR 1994

### Highlights

For the second year in a row, Arapahoe was the most popular winter wheat variety sown for the 1994 crop with 32.9% of Nebraska's acreage. Centura rose to second place with 11.1% by passing Thunderbird which dropped from 12.4% of the 1993 crop to 10% of the 1994 crop. Siouxland, at 6.4%, and Redland, at 6.3%, round out the top five.

Arapahoe was the leading variety in all Agricultural Statistics Districts. Centura was a strong second in the Panhandle with Thunderbird second in the East Central and Southwest, while Karl made a large jump in the Southeast.

### Data Source

The wheat variety data was provided through the response of many Nebraska wheat producers in our annual Fall Acreage and Production Survey. The wheat variety survey summary included 1,176 reports representing about eleven percent of the State's total planted acreage estimate.

This wheat variety survey summary was made possible with Nebraska producer wheat check off funds provided by the Nebraska Wheat Board.

## NEBRASKA--WINTER WHEAT VARIETIES ESTIMATED PERCENTAGE PLANTED TO EACH VARIETY, 1986-1991, 1993 & 1994 1/
